A testing bed for the development of high-risk medical devices.

Newsletter Issue N° 2

Welcome...

... to the 2nd edition of the TB MED newsletter. 2020 turned out to be quite different from what we expected at the beginning of the year. As with countries and institutions all over the world, COVID-19 has also hit the TB MED consortium. But despite the difficult circumstances, including lockdowns and months of working from home, we have managed to keep the impact as small as possible and continued our path to develop our Open Innovation Test Bed (OITB).

Successful completion of first 18 project months

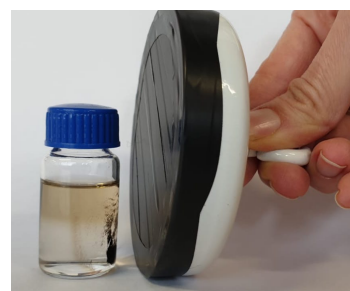

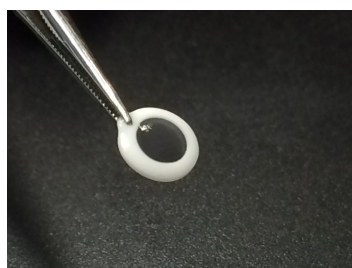

It is amazing how time flies: the first 18 months of our TB MED project are already over. The end of our first project period came along with our first review meeting.

Meet our use cases

The future OITB will offer a vast variety of services relevant to the development of high-risk medical devices. At the center is the **Quality by Design** (QbD) approach, however, a variety of other services such as efficacy and safety testing or clinical advice will also be available. TB MED has included three use cases at different stages of development in its work plan to reduce the risk and the time in the implementation process of the OITB.

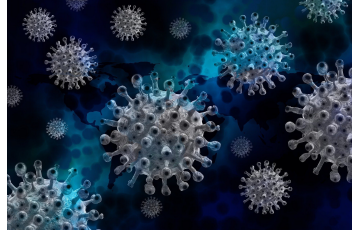

Find out more about our use cases and which potential OITB services are applied!

COVID-19 Open Call

The novel corona virus causing COVID-19 overwhelmed Europe and the world in just a few weeks' time. Especially Small and Medium-sized Enterprises (SMEs) are put at high risk by the slowdown or shutdown of economic life in their countries. In this case of emergency the three MedTech Open Innovation Testbed (OITB) projects TBMED, MDOT and SAFE-N-MEDTEC decided to work together and open a call to include new case studies in their on-going projects.

■ The call is open. Apply now!

Upcoming events

CLINAM - Virtual summit taking place on October 25-28, 2020

MEDICA 2020 - Virtual trade fair taking place on November 16-19, 2020

■ Stay tuned about future events.

We hope that you enjoyed this issue of the TBMED newsletter. Watch out for our next issue with more exciting news from our project.
